EDUCATION

Monash University Malaysia **February 2026 - Present**
Bachelor of Computer Science, ***CGPA 2.75 (Semester 1)***

- *Year 2 semester 2.*

SEGi University & Colleges **January 2025 - December 2025**
Bachelor's Degree, Information Technology ***CGPA: 3.7***

- *Completed one year of IT coursework before transferring to Monash with credit transfer*

DESCRIPTION

Second-year Bachelor of Computer Science student at Monash University Malaysia. Google Cloud certified with networking, data/ML, and infrastructure fundamentals, Also well-versed in Cybersecurity theory and concepts, including security protocols, cryptography, and the use of AI automation in cybersecurity methods, also interested in IoT systems. Has a strong foundation in object-oriented and functional programming (Java, Python, Haskell, JavaScript) alongside experience with Docker, Git, and Firebase. Personally interested in cybersecurity methods and theory, alongside web development and UI/UX design. Eager to learn from others and to contribute with real work in the industry. Available from November 2026 to February 2027.

PROJECTS

Flutter- Food Delivery App |SEGi University **2025**

- Worked in a group of three to create a food delivery app with Flutter for three months, which contained Cross-Platform Compatibility with both web and mobile systems.App was integrated with Firebase for user authentication and for storing user profiles
- Assisted both in creating new features, and in designing prototype interfaces of how our app would look
- Ran a successful demo of our app alongside group members

FlippyBit - Monash University **2026**

- Created a website that successfully runs a FlippyBit game, integrating HTML, CSS and TypeScript
- Integrated functional reactive programming and RxJS Observable streams to handle real-time user interactions.

Stack-Queue Valley - Monash University **2026**

- Built a text-based rogue-like game in Java, applying OOP principles and the provided engine classes, adhering to DRY, SOLID, and KISS principles.
- Wrote clear, well-documented code so the system was intuitive and maintainable.
- Used Git throughout the project for version control when working individually, and later to coordinate with fellow group members for collaboration.

CERTIFICATION

Google Cloud - Certified **October - November 2025**

- Cloud Computing Fundamentals
- Cloud Load Balancing
- Data, ML, and AI in Google Cloud
- Networking & Security
- Infrastructure and App Dev Environment

TECHNICAL SKILLS

Programming Languages : Java, Python, JavaScript, HTML, CSS, Haskell, SQL

Tools and Frameworks: Docker, Git, Flutter, Firebase
Cloud Computing: Cloud Computing Fundamentals, Cloud Load Balancing, Networking & Security, Data, ML & AI, Infrastructure & App Dev Environment
Cybersecurity: Basic cybersecurity concepts and theory, Cryptography, AI for cybersecurity, Security Protocols, Web application and Database security
Other: English Technical writing, Procreate (program), Creative/Visual design
Languages: English (proficient), BM, Chinese
